

Understanding Alström Syndrome

One Day Course

Overview

Alström Syndrome is a very rare and recessively inherited condition that is characterised by a number of key conditions including retinal degeneration, sensorineural hearing loss, obesity and insulin resistance, which often means late diagnosis of the condition.

Because of its complexity and rarity, many GP's and other professionals have not come across Alström Syndrome before. By raising awareness, earlier diagnosis and improved treatment should follow.

Who should come on the course?

- Anyone working in the following settings would benefit from the course.
- It is also beneficial to anyone working with people with other rare complex diseases as many of the problems encountered by Alström Syndrome patients are experienced by everyone with rare complex disorders.

Medical: GP's, Cardiology Depts, Diabetes workforce (children and adults), Renal Depts, Audiology Depts, Eye hospitals, Paediatricians, Medical training schools.

Educational: Schools for blind children, VI workers in mainstream schools, VI workers in Universities, Colleges for blind people, Schools for deaf children, Colleges for deaf people

Social: Other charities e.g. Deafblind UK, Sense, RNIB, RNID, NDCS, Diabetes UK, Dilated Cardiomyopathy association etc. Deafblind workforce (dealing with both children and adults), Visual Impairment teams in social services.

Learning Outcomes

Throughout this course participants will:

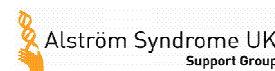

- Learn how to improve treatment of people with Alström Syndrome.
- Understand how to communicate with people who have a hearing loss and a visual impairment.
- Raise awareness and understanding of the Syndrome.
- Encourage good practice within their organisation.

Training is delivered on behalf the charity Alström Syndrome UK by HearFirst, an independent provider of disability related training.

HearFirst, Lower Acre, Todmorden Road, Bacup, Lancashire, OL13 9EB
